MY PROFILE

I am currently working in marketing and design for three companies and continue to study development part time. I have a qualification in software development and during these studies, I had to manage time very well as I had to complete the course and exams within specific dates and meet the required deadlines. This taught me a lot about time management. I am currently continuing to study web and python development part time, after work hours, to keep up to date. I am a very self-disciplined and creative person and able to work in teams designing and developing software.

TECHNICAL SKILLS

- **Web Development**
- **Software Development**
- **Design**
- Marketing
- Photo and Videography
- Video and Photo editing
